

Smidnya IL22

Round Volt/Amp Pilot Light

Smidnya IL22 Round Volt/Amp Pilot Light is a compact 22 mm panel-mount indicator designed for voltage and current indication in electrical and control panel applications. Its illuminated display provides clear V and A readout, and the included current transformer supports practical monitoring in panel environments.

KEY FEATURES

Clear Volt/Amp display

22 mm round panel mounting

Includes external current transformer

Suitable for control panel indication
